SUBJECT

Application for Fullstack Developer

Dear Hiring Team,

I am writing to express my strong interest in joining your team as a Fullstack Developer. Currently completing my studies at **Teknikhögskolan** and finishing a successful LIA internship at **FBK Balkan**, I've built a solid foundation in modern web development and agile leadership.

During my time at FBK Balkan, I have been deeply involved in developing a Youth Portal web application. This wasn't just about writing code; I took on the **Scrum Master role** to ensure our team stayed on track while I focused on building RESTful APIs with Spring Boot and managing complex relational database structures. My technical stack—spanning from Java and SQL on the backend to React and TypeScript on the frontend—allows me to build full-scale solutions from the ground up.

Beyond the internship, I've consistently pushed my limits through personal projects like a **Hair Salon Booking System** and a **Web Scraper API**. I also have a deep interest in the future of our industry, specifically in AI-driven development and contributing to open-source projects like OpenClaw. I don't just want to build apps; I want to build tools that are intelligent and community-focused.

What I bring to the table:

- ✓ **A Fullstack Mindset:** Comfortable jumping between Spring Boot services and Tailwind-styled React components

- ✓ **Agile Leadership:** Practical experience as a Scrum Master, handling team workflows and version control with Git
- ✓ **Adaptability:** A proven track record of learning quickly and applying new technologies to solve real-world problems

I am eager to bring my motivation and technical skills to your team. Thank you for your time and for considering my application.

Best regard,

Abdelrahim Elhaj
Fullstack Developer
